

## Denford Power Packs:

### IMPORTANT SAFETY DATA:

CO2 Power Packs are made of 100% recyclable steel and are not refillable.  
Cartridge contains 8g of Carbon Dioxide (E290) under high pressure.  
Please only use with a device approved for this cartridge and follow manufacturers instructions.

Non-aerosol. Non refillable. Recyclable steel.

Never dispose of full cartridges.

Keep out of reach of children.

Explosion danger: 50C max temperature.

Do not take onboard an aircraft.

Colour: Silver.

If you are burnt by freezing CO2 you must immediately seek medical advice. A CO2 burn can cause deep tissue damage which is not immediately obvious at the time of the injury.

### Recycling

Gas cartridges are not refillable. They are made with 100% recyclable steel. They are safe to put in with your tin cans etc for collection. Please do not dispose of unused cartridges!

### More information about CO2:

CO2 or Carbon Dioxide is an odorless, colorless, non inflammable gas with a light sour taste, it does not contain any minerals, salts or other solid ingredients.

CO2 is used worldwide for food preparation, deep freezing and as a propellant for carbonated drinks. Our CO2 Chargers are filled with 100% pure CO2.

Warning - cartridge is filled with liquified gas under high pressure. Please ensure the cartridge is empty of gas before removing from your device. Cartridge gets very cold when it is punctured.

If you are burnt by freezing gas you must immediately seek medical advice. A high pressure gas burn can cause deep tissue damage which is not immediately obvious at the time of the injury.

### Cartridge Data:

Cartridge contains 8g (10 Cubic cms) of pure CO2 at approx 60bar/900psi.

Cartridge Volume/Water capacity: 10ml.

Filling Pressure: 8MPa

Non-Threaded.

Cartridge total weight: 28gm.

Size: 66mm x 17.8mm.
