

## T.D.S. 1L.S

Designed on the same basic heavy structure as the G.B. or P.C.S. models this is a **LOW COST LATHE INCORPORATING MOST KEY FEATURES** such as;—

- (a) 8 spindle speeds – 4 through back gear.
- (b) Screwcutting facilities.
- (c) Powered longitudinal feed through lead screw.
- (d) Hand operated traverse to cross slide.
- (e) Full electrical and mechanical safety features.

## T.D.S. 5B.G

**(BACK GEAR)**

For primary training with hand longitudinal and cross-traverse feeds only.

- (a) 8 spindle speeds – 4 through back gear.
- (b) Hand operated traverse to compact saddle.
- (c) Electrical safety switches to belt change door.

## T.D.S 3M.W

**COMBINED METAL  
& WOOD TURNING LATHE**

(T.D.S. 3M.W/L.S Power Longitudinal Feed Illustrated)

Has been designed to meet the ever-increasing demand for a dual purpose Lathe for workshops where space and requirements do not warrant individual lathes. Also the extra equipment available for the 'VICEROY' Metal and Wood Turning Lathes interchangeable where applicable.
